What's New in Windows 10

Windows Latest update 2010 released October 2020.

Previous Update 1909 was released in September 2019.

What's New in Windows 10

Did you know their 2 current Windows 10 Products?

Windows 10 (Home/Pro)
Windows S

The big difference between Windows 10 S and any other version of Windows 10 is that 10 S can only run applications downloaded from the Windows Store. Every other version of Windows 10 has the option to install applications from third-party sites and stores.
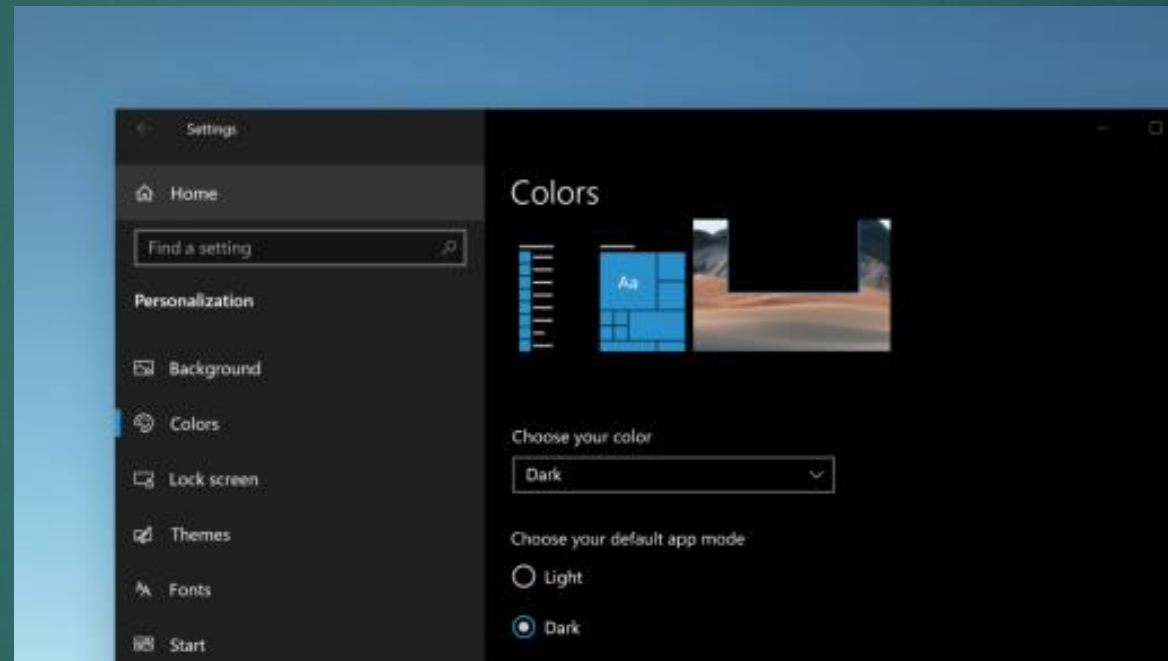

What's New in Windows 10

New features in recent Windows updates will help you customize your PC, increase security, and get more creative with Windows 10. With these updates, it'll also be easier to get things done on your PC and across your other devices, *including syncing to Android phones (7.0 or later).*

Microsoft EDGE is now an intracule part of Windows 10. for the time being Internet Explorer still exits.

Use Snip & Sketch to capturer, markup up and share images

What's New in Windows 10
Use Snip & Sketch to capturer, markup up and share images

Screen sketch is now called Snip & Sketch. Open Snip & Sketch to take a snip of what's on your screen or to mark up and share a previous image. In the search box on the taskbar, type **Snip & Sketch**, then select **Snip & Sketch** from the list of results to open the app.

To quickly take a snip, press the **Windows logo key** +**Shift**+**S**. You'll see your screen darken and your cursor displayed as a cross. Choose a point at the edge of the area you want to copy and left-click the cursor. Move your cursor to highlight the area you want to capture. The area you capture will appear on your screen.

The image you snipped is saved to your clipboard, ready for pasting into an email or document. If you want to edit the image, select the notification that appears after you've made your snip. Snip & Sketch offers options to save, copy, or share and includes a pen, highlighter, and an eraser, all with variable line widths.

What to do before performing a Major windows update

Backup your system:
   If you don't have a backup device, at the very minimum create a RESTORE POINT

This is a major update: Your system will reboot several times during the update process.   DO NOT TURN OFF your system.
